OVERVIEW
PRI / Nadcap

Nadcap is an unprecedented cooperative industry effort to improve quality, while reducing costs, for quality assurance throughout the aerospace and defense industries. Nadcap is an industry-managed approach to conformity assessment that brings together technical experts from both industry and government in the Nadcap organization. Prime contractors, suppliers and representatives from the Government work together to establish requirements for accreditation, approve suppliers and define operational program requirements. Unlike traditional third-party programs, Nadcap is an industry managed program. This process results in a standardized approach to quality assurance and a reduction in redundant auditing throughout the aerospace industry because industry has joined forces to develop a program that:

- Establishes stringent audit criteria and requirements to meet industry consensus standards of all participants
- Replaces routine auditing of suppliers with one approved through a consensus decision-making process of members from the user community
- Conducts more in-depth, technically superior special process audits
- Improves supplier quality throughout industry through stringent requirements
- Reduces costs through improved standardization
- Utilizes technically expert auditors to assure process familiarity
- Provides more frequent audits for primes, fewer audits for suppliers

Beneficiaries of improvements resulting from Nadcap are as diverse as Nadcap's many customers. A participating prime contractor reports a saving of over $1 million annually while achieving technically superior audits. An accredited Nadcap supplier has tracked a 97% reduction in rework resulting from improvements to their system stemming from Nadcap requirements.

Nadcap Facts

- Nadcap has over 4,200 accredited auditee locations of special processes and products listed on the Nadcap Qualified Manufacturers List (QML)
- Nadcap has conducted over 86,000 audits since 1990 with 6,000+ audits expected in 2020
- Subscribing prime contractor/government – 40
PRI and the GDPR

PRI values our relationship with you and we understand that respecting your personal information is an important part of the trust between us. It is our aim to be completely transparent about how we collect and use the personal information you provide to us. We use the information you provide to us prior to and during Nadcap meetings for our mutual legitimate interest, to create the documents associated with the meeting such as attendee badges and meeting minutes. PRI’s privacy statement is available online at https://p-r-i.org/privacy/ and at the Nadcap meeting registration desk.

If you have any questions, contact GDPR@p-r-i.org or any member of PRI staff.

Photo Release

Photographs may be taken by the Nadcap Meeting organizers and the Nadcap Meeting organizers may use them in news or promotional materials whether in print, electronic format or other media, including the conference website. By participating in and registering for the Conference, you grant Performance Review Institute (PRI) and Nadcap the right to use your name and/or photograph for such purposes. Other attendees may also take photographs at the meeting for their own use. These should not be in any commercial context without prior written approval from PRI. If you have any questions, contact privacy@p-r-i.org or any member of PRI Staff.

GETTING THE MOST OUT OF Nadcap

The benefits received by member companies vary in direct proportion to their participation and flowdown into their own corporate structures. Nadcap is a tool that provides significant benefits when utilized properly. In order to maximize your benefits from Nadcap, the following tips will help:

**For Subscriber Members**

1. Clearly define your objectives, support and expectations for Nadcap. Share this information with your company’s key personnel and Nadcap representatives. Ensure that management decisions (e.g., require or accept Nadcap accreditation and stop own auditing) are incorporated by organization.
2. Select personnel to represent your company to the task group who have demonstrated expertise in the task group area of responsibilities. Ensure all attendees have a basic understanding of the Nadcap process.
3. Ensure appropriate personnel in your company (sourcing & quality) are familiar with Nadcap's operation and the company's policies concerning Nadcap.
4. Address changes necessary in your current operations to provide for maximum implementation of Nadcap throughout your corporate structure.

**For Supplier Members**

1. Understand the objectives of Nadcap and participate in the improvement of the process. Attend Supplier events and meetings.
2. Utilize the many resources available on the PRI Website (www.p-r-i.org) and eAuditNet (www.eAuditNet.com). These resources are summarized in a document found at:
   
   eAuditNet→Resources→Documents→Public Documents→Supplier →SSC Documents→Supplier Tool Sheet

3. Take advantage of the Supplier Mentoring program which can pair you with an experienced supplier to help you understand the common pitfalls in audits.
4. Perform a thorough and effective pre-audit well before your actual audit and correct any deficiencies found. Document your objective evidence.
5. After your Nadcap audit move swiftly to identify root causes and implement effective corrective actions in response to audit nonconformances.
6. Promote your success; notify your customers of your Nadcap accreditation.
ANTITRUST

Associations by nature involve communications or activities among members who are business competitors. Extreme care must be exercised to avoid policies, programs, dialogues, or pursuits, which could be seen as having an intention or result of restraint of trade. Conscientious antitrust compliance and fairness to participants demand that association meetings be conducted properly. Only legitimate subjects for association discussion should be undertaken. Chairpersons have been instructed that parliamentary rules and procedures should be followed at all meetings.

Nadcap Personal Code of Ethics and Conflict of Interest

All individuals (Subscribers, Suppliers, Staff, Auditors, etc.) involved with the Nadcap activity shall exhibit acceptable professional standards of conduct and uphold and advance the integrity of Nadcap.

Each individual is expected to exercise impartial professional judgment to assure confidence in the integrity of Nadcap by avoiding conflicts of interest in all Nadcap related activities.

When a competing interest has the potential to preclude or impair exercising one’s independent professional judgment or unreasonably jeopardize the integrity of the Nadcap activity, the individual should disassociate themselves from that particular activity.

Any person associated with the Nadcap activity who believes that continued participation by any other person may jeopardize the integrity of Nadcap should bring the matter to the attention of the Nadcap Management Council.

All Nadcap Staff, its Auditors, Nadcap Management Council and Task Group Members shall maintain proprietary or confidential information with which they become familiar as a result of their exposure to the supplier and/or reports during the accreditation process appropriately. Information of this type shall not be shared with individuals or organizations having no right to this information.

All individuals associated with the Nadcap audit and review process shall avoid using undue influence or personal conversation to influence the audit results or the review process.

Any known violations to the above policy may be reported to the ad hoc Nadcap Ethics Committee at NadcapEthics@p-r-i.org.
NEUTRALITY

In keeping with the spirit and purpose of the Nadcap program, Nadcap meetings and other Nadcap-sponsored events are non-commercial events conducted for the benefit of all participants.

We respectfully request that companies refrain from any activity that serves a commercial purpose at a Nadcap meeting or other Nadcap-sponsored event, including but not limited to hosting a promotional event (hospitality suites, receptions, site tours, etc.) and distribution of marketing materials.

Any company that engages in such activities in conjunction with a Nadcap meeting or Nadcap-sponsored event may be asked to leave the event and any promotional material may be destroyed.

EXPORT CONTROL

The Nadcap process accounts for the need to control the exchange of information, data, etc. that is restricted under export control regulations. This includes information which is shared or presented during Nadcap meetings, conference calls, and in discussions between meeting attendees. All attendees must take precautions to ensure that no information or material which is restricted under any export control regulation is included in any presentation or discussion during Nadcap meetings. If you are unsure as to whether or not the data with which you’re working is restricted under the Export Administration Regulation (EAR), the International Traffic in Arms Regulation (ITAR), and/or any other international export control law(s), you are legally obligated to contact the organization with whom the data originated for clarification.

RECORDING POLICY

Audio or video recording of Nadcap meetings is prohibited unless formal approval is received from all attendees and recorded in the minutes. Violators of this policy will be asked to stop recording. Failure to stop recording or repeated attempts to record may result in expulsion from the meeting and/or the Nadcap program.

MEMBERSHIP RESPONSIBILITIES

1. Subscriber members are expected to attend all Nadcap meetings. If the member is unable to attend, an alternate may be designated.
2. Other Nadcap members should make arrangements to attend all meetings where policy, procedures, audit criteria, etc., will be discussed. Non-subscriber members shall review agenda to determine if they should attend.
3. Reply to surveys, questionnaires, and ballots that are circulated to members.
4. Carry through sponsorship and coordination of individual projects as assigned.
5. Prepare checklists for auditing and continuing surveillance.
6. Review resumes and interview auditors.
7. Review audit reports.
8. Participate in oversight audits.
MEMBERSHIP CATEGORIES

Subscriber Prime | Subscriber Prime members are those aerospace or defense contractor prime companies who are Nadcap Subscribers, and Design Approval holders or Design Authorities of Aviation, Defense, and/or Space products for end use products or significant systems or subsystems for such products. Companies qualifying as Subscribers supporting Commercial Aviation shall hold approvals such as Technical Standard Order (TSO), Type Certificate (TC), Supplemental Type Certificate (STC) or Design Organization Approval (DOA) from an applicable regulatory agency or have been delegated design authority for major aircraft sections such as the fuselage, wing, or empennage from companies holding such approvals. Companies qualifying as Subscribers supporting Defense or Space shall demonstrate Design Authority of active product which is recognized by the industry as end-use products or significant systems or subsystems (such as propulsion systems, brake systems, aero structure systems, or the equivalent). These Subscriber Members have the design authority to write their own special process specifications and have internal engineering organizations to provide technical directions and support. Subscriber organizations which are structured to provide networked resources within their corporation for design and special process technical directions and support may identify subsidiary organizations or joint ventures owned by only Subscribers as part of their Subscriber Agreement with associated rights and obligations provided such organizations either meet the Subscriber Prime criteria or provide special process services solely to their corporation or joint venture corporations and not to other customers.

Subscriber | Representative from government agencies. Has vote in all Nadcap activities.

Government | 

Supplier | Active supplier who is participating in developing and revising audit criteria. Has vote in task groups on non-accreditation matters.

Liaison/Specialist | Individual who has specific technical knowledge for a particular task group.

Pending Subscriber | Same as Subscriber. This grade is temporary to allow new Subscribers to participate.

Guest | May attend Nadcap meetings. May attend audit reviews by invitation only.

MEETING PARTICIPATION
AND VOTING PROCEDURES

Meeting Participation

- All attendees can attend open meetings.
- Closed meetings may be attended only by subscribers, and pending/provisional subscribers.
  - At Closed meetings, audit reports are reviewed, or accreditation status of suppliers is discussed.
- NMC Voting Member Only meetings are restricted and may only be attended by NMC Voting Members.
- Other members may be included in Closed or NMC Voting Member Only meetings at the invitation of the Chairperson.

Voting

- Nadcap Management Council: Majority of eligible members present with a minimum of five subscriber members.

- All other meetings: Majority of eligible members present with a minimum of three subscriber members, or per Task Group procedure.

- When discussing critical issues, chairperson may call for voting members or subscriber members vote only.

NMC SUPPLIER VOTING MEMBER POLICY

Each Nadcap commodity task group may have one appointed supplier member with full voting privileges at Council, on non-accreditation matters. The total number of supplier voting members shall be limited to 50% of the total number of Subscriber voting members, and the number of supplier votes shall not exceed 33⅓ % of Council voting members. The Nadcap Management Council Chairperson will maintain the right to call for a Subscriber vote only.

Mission Statement:
The Nadcap Supplier Support Committee (SSC) mission is to represent the Supplier community and work with the Nadcap Management Council (NMC) to enhance the effectiveness and economical value of the Nadcap system for the mutual benefit of Suppliers and Subscribers.

Vision Statement:
The Supplier Support Committee (SSC), a body of Supplier volunteers, serves as a consolidated voice to the NMC and advocates on behalf of all Suppliers. The SSC will contribute as a trusted partner with all stakeholders to the continual effectiveness of the Nadcap process.

Our success will be realized through strict adherence to our core values of respect, responsiveness, engagement and accountability.

Core Values:
- **Respect:** Support the entire Supplier community with mutual respect.
- **Responsiveness:** Capture, listen and respond to the Supplier needs/questions in a timely manner.
- **Engagement:** Create an atmosphere that promotes Supplier involvement.
- **Accountability:** Accountability rests on the contributions of the Leadership Team.

Guiding Principles:
We are committed to…
- The integrity of our relationship with our fellow Suppliers and value their participation and commitment to continuous program improvement
- Complete transparency to maintain the value of the Supplier voice
- Facilitating alignment between the Suppliers, PRI and NMC
- Communicating with all stakeholder groups that allows innovative ways to enhance the program
- Sustaining advocacy of all current and future Supplier needs and expectations
- Assisting Suppliers with their non-technical needs

The Chemical Processing Task Group is conducting audits to demonstrate compliance to the AC7108 series of documents. These audits address the following types of processes:

- Acid Cleaning, Passivation and Electro-Polishing
- Anodizing
- Brush Anodizing and Plating
- Chemical Milling and Alpha Case Removal
- Cleanliness Verification
- Conversion and Phosphate Coating
- Electro / Electroless Plating
- Etch Inspection
- Paint and Dry Film Lubricant Application
- Pre-Penetrant Etching
- Solution Analysis and Testing
- Stripping of Coatings
- Surface Preparation Prior To Metal Bond
- Vacuum Cadmium Deposition and Ion Vapor Deposition-Aluminum

The Coatings Task Group is conducting audits to demonstrate compliance to the PRI AC7109 series of standards. These documents contain the Nadcap requirements for the following:

- Thermal Spray
- Vapor Deposited Coatings
- Diffusion Coating Processes
- Stripping of Coating Materials
- Coating Evaluation
- Plating of Coated Parts
- Heat Treating of Coated Parts
- Grinding of Coatings

**PRI Staff Engineer Contacts:**

**ATTENTION ALL Nadcap COATINGS (CT) SUPPLIERS**

In order to smoothly facilitate your upcoming Nadcap initial or re-accreditation audit, the Nadcap Coatings Task Group would like you to be aware that numerous self-help items have been developed to guide you through the process. The path provided below will lead you to the Coatings Audit Handbook file which is a quick and easy reference tool providing numerous self-help items pertinent to every stage of the Nadcap audit process. You are encouraged to take advantage of these valuable self-diagnostic references prior to your Nadcap audit. Of particular interest is Appendix 5 covering Resources and Documents, which provides a reference to the key procedures and resources relevant to the Nadcap audit. They may help you to avoid many of the most common findings and maximize your benefit throughout the audit while minimizing overall costs to your business.

**Path:** eAuditNet→Resources→Documents→Audit Criteria→Coatings→Handbooks & Guides→Coatings Audit Handbook

The Nadcap Coatings Task Group is committed to continually improving the program for all participants and welcomes all suggestions that support their efforts. Please do not hesitate to contact Justin Rausch with your suggestions or attend a Nadcap meeting to contribute your ideas in person.
The Composites Task Group is conducting audits to demonstrate compliance to the PRI AC7118. These audits address the Nadcap requirements for the following processes:

- CMP – Compression Molding
- CP – Core Processing
- KSP – Kitting Service Provider
- LRP – Liquid Resin Processing
- MB – Metal Bonding
- PAR – Prepeg/Adhesive Bonding/Resin Film Infusion

This task group has published the checklists (AC7101/1 – AC7101/7, AC7101/9, AC7101/11, & AC7006) for Materials Testing Laboratories. Types of activities being accredited:

- ISO/IEC 17025 Requirements
- Chemical Testing
- Mechanical Testing
- Metallography (Micro & Macro)
- Hardness
- Corrosion
- Microhardness
- Test Specimen Preparation
- Fastener Testing

The Nonconventional Machining and Surface Enhancement (NMSE) Task Group is conducting audits to demonstrate compliance to the AC7116 series of checklists for nonconventional machining and the AC7117 checklist for surface enhancement. These audits address the following types of processes:

**Nonconventional Machining**

1. Electrochemical Machining (ECM)
2. Electrochemical Grinding (ECG)
3. Electrical Discharge Machining (EDM) – Fast Hole, Sinker, Wire
4. Laser Beam Machining (LBM) – Cutting, Drilling
5. Laser Part Marking (LPM)
6. Spark Erosion Grinding (SEG)
7. Abrasive Water Jet Machining (AWJM)

**PRI Staff Engineer Contacts:**
Mark Hunkele (Lead), +1.724.772.8689, mhunkele@p-r-i.org
Christine Nesbitt, +1.724.772.4073, cnesbitt@p-r-i.org

**Task Group Leadership:**
- **Chairperson:** Zeljko Calija, Collins Aerospace (Goodrich)
- **Vice Chairperson:** Jocelyn Fortin, SAFRAN Group
- **Secretary:** David McCallister, Pratt & Whitney

**Task Group Members**

**Subscriber Voting Members (UVM)**

NON METALLIC MATERIALS TESTING (NMNT)

The Non Metallic Materials Testing Task Group is conducting audits to demonstrate compliance to the PRI AC7122-I for Independent Testing Laboratories, PRI AC7122-P for Part Manufacturers Captive Laboratories and PRI AC7122-R for Raw Materials Manufacturers Captive Laboratories. These audits address the Nadcap requirements for the testing of Class A: Composites and Class B: Adhesive/Adhesive Primer

- Mechanical Testing
- Physical Testing
- Chemical Testing
- Thermal Testing
- Flammability Testing

SEALANTS (SLT)

The Sealant Task Group is conducting three types of audits for Nadcap accreditation:

1) Sealant Manufacturers: AC7200/1 – Assessment of a sealant manufacturer’s ability to provide a product that conforms to sealant specifications and customer requirements

2) Value-Added Sealant Distributors: AC7202 - Assessment of a sealant repackager’s ability to provide sealant in a final package which include can kits, injection kits, pre-mixed and frozen (PMF), one-part cartridge, and PMF seal caps that conforms to sealant specifications and customer requirements

WELDING (WLD)

Process specific requirements have been developed by the Welding Task Group and are contained in the AC7110 series of checklists. Welding processes covered include:

- Additive Manufacturing
- Diffusion Welding
- Electron Beam Welding
- Flash Welding
- Friction/Inertia Welding
- Fusion Welding
- Laser Welding
- Percussion Stud Welding
- Resistance Welding
- Torch/Induction Brazing
- Welder/Welding Operator Qualification
- Evaluation of Welds

Training Sessions

eAuditNet Overview for Subscribers
Monday, 15th June
Directly following the Subscriber Orientation & Tutorial

eAuditNet Overview for Suppliers
Monday, 15th June
During the New Supplier Information Session
Introduction to PRI/Nadcap

The Introduction to PRI/Nadcap is a free, web based training program designed to teach suppliers more about the Nadcap process. This webinar training reviews multiple topics including: audit preparation, a review of Nadcap Operating Procedures, information on common findings, Root Cause advice and more.

To better support the Nadcap supplier community, the Introduction to PRI/Nadcap training is now translated into French and German. Translations provide greater availability for suppliers, who can benefit from the information in their native language.

This webinar is offered by the PRI Training program free of charge as a live webinar option, and also as a recording to view online at your convenience. If you have any questions regarding this webinar, please contact a member of the PRI Training team or email PRI-Training@p-r-i.org.

Subscriber Orientation & Tutorial

All new Subscriber participants are advised to attend the Nadcap Subscriber Tutorial at 9:00 a.m. EDT on Monday, 15th June. The tutorial is a general Nadcap presentation geared toward Subscribers. It provides the audience an overview of the structure and functionality of the Nadcap program. As well as the opportunity to ask general Nadcap questions.

New Supplier Information Session

All new Supplier participants are advised to attend the New Supplier Information Session beginning at 9:00 am EDT on Monday, 15th June. The tutorial is a general Nadcap presentation geared toward Suppliers. It provides the audience an overview of the structure and functionality of the Nadcap program, as well as the opportunity to ask general Nadcap questions.

Supplier Support Committee (SSC)

The Supplier Support Committee’s (SSC) Mission is to represent the supplier community and work with the Nadcap Management Council (NMC) to enhance the effectiveness and economical value of the Nadcap system for the mutual benefit of Suppliers and Subscribers. The SSC is made up of active Nadcap accredited Suppliers who are willing to help new Suppliers through the process, as well as assisting experienced Suppliers to establish, maintain and improve their accredited processes. The focus of the SSC is on the overall Nadcap procedural process and issues which affect all Nadcap accredited Suppliers.

The SSC offers a Supplier Mentoring program, dedicated to assisting those Suppliers who are new to the process and/or those needing assistance with navigating through the Nadcap system by providing names and contact information of experienced Nadcap Suppliers. If you would like to work with a Mentor please send an email to NadcapSSC@p-r-i.org.

For your convenience, when available, the SSC presentations will be posted on eAuditNet at Resources/Documents/Public Documents/Supplier Support Committee (SSC)/SSC Meeting Presentations/June 2020 – London one week prior to the Nadcap meeting.
